## HIGH PERFORMANCE DIAPHRAGM (HPD) LIQUID END MODEL CODE

### NOTES:

- \* Plunger codes 16, BG, 20, CA, 24, CE, & 32 are not available with plastic liquid ends (liquid end material code 2) since this capacity range is covered by the Milroyal B Series.
- † Plunger codes 40 & 56 are only available with double ball checks (ball quantity code 22) when ordered in plastic.
- ‡ Plunger codes 80 & 92 are only available with poppet valves on metallic pumps or single ball checks on plastic pumps (ball quantity code 11), and ANSI 150 lb. socket weld connections (connection code S1). Plunger codes 80 & 92 are not available in Alloy C22 (liquid end material code 6).
- § Operating pressure is the application system pressure. The internal relief valve is normally set 15% above the operating pressure. If an internal relief valve setting greater than 15% above the operating pressure range is required, select the operating pressure range that will accommodate the relief valve setting.
- \*\* Refer to the suction pressure table for maximum suction pressure vs. range.
- †† Options C5, SN, and SE are only available on metallic liquid ends.
- ‡‡ Flange sizes equal the NPT connection size as noted on the liquid end drawing.
- §§ Explosion proof electronic actuators are certified by Factory Mutual for Class I, Division I, Groups B, C, & D; Class II, Division I, Groups E, F, & G.
- \*\*\* Special ball check and seat materials are available for severe slurry service. Contact factory.

### NOTES:

- \* Plunger Diameter Codes BA, AH, 24, 32, 40, 56 & 71 are available in 316 SS only. Other liquid end materials can be quoted by the Milton Roy Application Engineering Department. High pressure plunger diameter codes are for applications requiring pressures over 5000 psi.
- \*\* Packing code NM is a standard option for 316 SS liquid ends with plunger diameters of 1 1/2" and larger.
- \*\*\* Select packing lube GF with packing codes TM & NM. Contact Applications Engineering for other packing lube selection.
- † Refer to suction pressure table for suction pressure versus range.
- †† Flange sizes equal the NPT connection size as noted on the liquid end drawing.
- ‡ Alloy 20 liquid ends are available standard with packing code TM. Contact applications engineering for other packings or plunger materials with Alloy 20 liquid ends.
- ‡‡ The plunger material will automatically match the liquid end material when selecting packing/plunger material code TM.
- § Packing/plunger codes AL, TL, & VL are offered on 316 SS liquid ends with 7/16" through 1 1/8" plunger diameters. Contact Milton Roy applications engineering to apply to other plunger diameters or liquid end materials.
- §§ Packing/plunger codes AR, TR, & VR are offered on 316 SS liquid ends with 7/16" and 5/8" high pressure plunger diameters. Contact Milton Roy applications engineering to apply to other plunger diameters or liquid end materials.
- §§§ Explosion proof electronic actuators are certified by Factory Mutual for Class I, Division I, Groups B, C, & D; Class II, Division I, Groups E, F, & G.
