

## Plate Heat Exchanger Accessories

### Shrouds

Shrouds provide insulation and protection in an aggressive environment.

Other accessories include:

- Backflush valves
- Wrenches
- Grounding lugs
- Molybdenum bolt coatings
- Tie-rod protectors
- HexWrap insulation
- Insulated shrouds

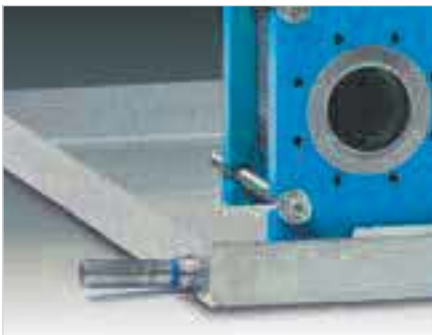

### Instruments And Gauges

Special flanges are available with outlets for drainage and ventilation, pressure gauges and sensors.

### Hydraulic Opening Devices

Hydraulic opening devices make disassembly and reassembly of the exchangers fast and easy. Most importantly, it is accurate, able to attain specified gasket compression.

### Drip Pans

Drip pans prevent water and other liquids from floating on to the floor when dismantling the heat exchanger.

### Port Strainers

A strainer protects the plate pack from large particles that would otherwise foul and clog the channels. The length is adapted to the number of plates.
